in written format

☐

in computer readable form

c. time of filing/furnishing

☐

contained in the international application as filed.

☐

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/JP2004/012538

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	_____	YES
	Claims	1-8	NO
Inventive step (IS)	Claims	_____	YES
	Claims	1-8	NO
Industrial applicability (IA)	Claims	1-8	YES
	Claims	_____	NO

2. Citations and explanations:

Document 1: JP, 2003-33991, A (Sumitomo Bakelite Co., Ltd.), 4 February, 2003 (04.02.03)

Document 2: JP, 2002-365624, A (Matsushita Electric Industrial Co., Ltd.), 18 December, 2002 (18.12.02)

Document 3: JP, 5-200888, A (Exxon Research & Engineering Co.), 10 August, 1993 (10.08.93)

The subject matters of claims 1-8 are substantially described in document 1 cited in the ISR, and appear to be novel. Document 1 describes a plastic substrate for a display device having a layer formed of glass cloth impregnated with an epoxy resin, and also discloses the feature of performing a gas-barrier process or a hard-coat process as required. Document 1 does not describe the elasticity of glass fibers or hardened epoxy resin; however, documents 2 and 3 describe the general elasticity values of glass fibers and hardened epoxy resin. In view of the said values, the range of elasticity p of ≥ 25 described in claim 1 of the present application would naturally be satisfied when a person skilled in the art uses typical materials.
